

BUILDING THE ELECTRONICS CIRCUIT

Course Name: Basic Electronics & Circuits

Description:

Nearly everything around, us contains circuits and electronics. They are smart and smaller in size. This course introduces students to the basic components of electronics and building circuits for different applications.

Course Duration	15 Hours
No. Sessions	15
Prerequisite	Basic Computer Skills
Age Group	9 Years onwards

Outcome from the course:

- Amazing projects on electronics.
- Understand about the important electronic components.
- Get started with building simple circuits using LEDs, resistors, batteries breadboard and other components.
- Understand and build electronic projects using the concepts.

Certificate: Digital Certificate

Requirements: PC/Laptop
